

Announcement and Call for Participation

MOBIHOC 2003

The Fourth ACM International Symposium on Mobile Ad Hoc Networking and Computing

June 1–3, 2003, Annapolis, Maryland, USA

<http://www.sigmobile.org/mobihoc/2003/>

Sponsored by ACM SIGMOBILE

General Chair

Mario Gerla
UCLA

Program Co-Chairs

Anthony Ephremides
University of Maryland

Mani Srivastava
UCLA

Tutorials Co-Chairs

Magda El Zarki
UC Irvine

Edward Knightly
Rice University

Publicity Co-Chairs

Sung-Ju Lee
HP Labs

Michele Zorzi
Universita'di Ferrara

Finance Chair

Violet Syrotiuk
Arizona State University

Local Arrangements Co-Chairs

Richard La
University of Maryland

Sennur Ulukus
University of Maryland

Publications Chair

David B. Johnson
Rice University

Registration Chair

Raghupathy Sivakumar
Georgia Institute of Technology

Poster Session Co-Chairs

Songwu Lu
UCLA

Jason Redi
BBN Technologies

Steering Committee Chair

Charles E. Perkins
Nokia Research

ACM Program Director

Ginger Ignatoff

MobiHoc 2003 is the fourth of a series of annual meetings sponsored by ACM SIGMOBILE, focusing on the latest research in the rapidly growing area of mobile ad hoc networking and computing. The first MobiHoc was held in 2000 in Boston, Massachusetts, as a workshop affiliated with the MobiCom conference also sponsored by SIGMOBILE. Since then, MobiHoc has become a separate symposium, held in 2001 in Long Beach, California, in 2002 in Lausanne, Switzerland, and now in 2003 in Annapolis, Maryland. Topics of interest include all areas of mobile and wireless ad hoc networking (above the physical layer), ad hoc computing, and sensor networks.

Keynote Speech:

Professor Martin Vetterli of Swiss Federal Institute of Technology (EPFL), Lausanne, Switzerland, and U. C. Berkeley, CA, USA, is giving a keynote talk on "Distributed Signal Processing and Communications: On the Interaction of Source and Channel Coding in Mobile Networks."

Papers:

There will be approximately seven technical paper sessions on a wide range of ad hoc networking topics. The list of accepted papers can be found at <http://www.sigmobile.org/mobihoc/2003/program.html>. Paper topics include resource management, security, transport layer issues, directional antennas, topology control, medium access control, sensor networks, mobility, and routing.

Posters:

There will also be a poster session at the reception, describing innovative and recent research on ad hoc networks.

Tutorials:

On June 1st there will be two tutorials. "Radiowave Channel Modeling for Radio Networks" will be held in the morning, and "Beamforming Antennas in Ad hoc Networking" will be held in the afternoon.

Hotel and Registration:

Hotel information is currently available on-line. MobiHoc 2003 will take place at the Sheraton Barcelo Hotel. You must reserve the room by May 10, 2003 and mention "ACM/MobiHoc'03" when making the reservation to insure the special rate.

The symposium is open for registration. Register by May 2, 2003 to get the early registration rates.

Important Dates:

Early registration deadline:	May 2, 2003
Hotel rate cutoff date:	May 10, 2003
Tutorials:	June 1, 2003
Conference:	June 2-3, 2003

For More Information:

Please visit the MobiHoc 2003 homepage or send email to the General Chair, **Mario Gerla** (gerla@cs.ucla.edu), or to the organizing committee mobihoc@ee.ucla.edu for any questions or for more information about the symposium.
