

MOBIHOC 2009

New Orleans, Louisiana, USA
May 18-21, 2009

<http://www.sigmobile.org/mobihoc/2009/>

IMPORTANT DATES:

Paper Abstract Registration: <i>extended</i>	November 21, 2008, 11:59 PM EST
Paper Submission Deadline: <i>extended</i>	November 28, 2008, 11:59PM EST
Notification of Acceptance:	February 20, 2009
Camera-Ready Version Dead- line:	March 10, 2009, 9:00am, EST

General Chair

Edward W. Knightly
(Rice University)

Program Committee Chairs

Carla-Fabiana Chiasserini
(Politecnico di Torino)
Xiaojun Lin (Purdue University)

Workshop Chair

Robin Kravets (UIUC)

Poster Chair

Isabelle Guerin-Lassous
(University of Lyon)

Demo Chair

Ashutosh Sabharwal
(Rice University)

Panel Chair

Kostas Psounis (USC)

Publicity Chair

Omer Gurewitz
(Ben Gurion University)

Steering Committee

Jean-Pierre Hubaux (Chair),
(EPFL)
Mario Gerla (UCLA)
P.R. Kumar (UIUC)
Joe Macker (Naval Research)
Sergio Palazzo
(University of Catania)
Charles E. Perkins (WiChorus)
Martha Steenstrup
(Clemson U., Stow Research)

ACM MobiHoc is the premier international symposium dedicated to addressing challenges emerging from wireless ad hoc networking and computing. With its highly selective technical program, the symposium will bring together researchers and practitioners from a broad spectrum of wireless networking research to present the most up-to-date results and achievements in the field.

We invite paper submissions on mobile ad hoc networks, wireless sensor networks, wireless mesh networks, vehicular networks and ad hoc computing systems, with the focus being on

- Applications and middleware support
- Transport, network, and MAC protocols
- Energy efficiency
- Location discovery
- Cross-layer design and control
- Network resilience, fault-tolerance, and reliability
- Functional computation and data aggregation
- Modeling and performance analysis
- Scaling laws and fundamental limits
- Network coding
- Opportunistic and delay-tolerant networks
- Vehicular networks
- Cognitive radio networks
- Distributed sensing, actuation, control, and coordination
- Trust, security and privacy
- System design and testbeds
- Measurements from experimental systems
