

MobiHoc 2016 seeks proposals for live demonstrations of mobile computing technologies. Particularly encouraged are the demonstrations that include participation by conference attendees. Research prototypes as well as commercial products are welcome. However, MobiHoc is not an appropriate forum for marketing or sales presentations. The presenter is expected to understand the system being demonstrated and explain the technical contributions of the system to the audience. Demonstrations of previously published systems are also welcome. Demonstrations will be selected based on the expected interest from the MobiHoc audience.

A demo submission requires only an extended abstract no longer than **two 8.5x11-inch pages**, including all figures and references, describing the demonstration as well as any special requirements (other than a demo booth/table). The extended abstract should be formatted in 8.5x11-inch pages, two columns, single-spaced, with a font no smaller than 10-point. The demo title should begin with "**Demo:** ". Submissions must be in Adobe PDF format. The submission should include

- a. the names, affiliations, and email addresses of the authors,
- b. equipment to be used for the demo,
- c. space needed and the required setup time,
- d. additional facilities needed, including power and Internet/wireless access.

Demo proposals should be submitted through EDAS
<https://www.edas.info/newPaper.php?c=22140&track=78999>.

Please use the [CR format](http://www.acm.org/sigs/publications/proceedings-templates) (<http://www.acm.org/sigs/publications/proceedings-templates>) for your submissions (please choose "[Option 2](#)" if LaTeX is used).

Demo Video

Authors of accepted Demo proposals are encouraged to submit a companion video clip showcasing their demo. Video clips should highlight the technical contributions of the demo and be no more than 90 seconds in length. Demo video clips will be posted on the conference website. Videos can be submitted by including a link to the video along with the extended abstract submission.

Best Demo

All demos will be considered for the *Best Demo Award*. The winner will be selected at the conference by an independent review committee.

Important Dates

Submission deadline: April 29, 2016

Notification: May 16, 2016

Camera Ready: June 1, 2016
